Subject: RE: EPA-PA DEP EtO Emissions/Modeling/Risk Discussion
Attachments: aermod-Cosmed.inp; aermod-ACS.inp; aermod-Braun.inp

Hi All,

As a follow up to our meeting today, attached are the AERMOD input files for the 3 facilities. Only Cosmed had source category emissions other than ethylene oxide (ethylene glycol).

Braun also had non-source category emissions of other HAP ("whole facility" emissions), but they weren't included in our source category risk assessment for the rule or public outreach. We did a separate "whole facility" risk assessment and found the non-source category emissions had no impact on the cancer risks.

Thanks,
Matt

Subject: EPA-PA DEP EtO Emissions/Modeling/Risk Discussion
When: Wednesday, June 1, 2022 12:30 PM-1:30 PM (UTC-05:00) Eastern Time (US & Canada).
Where: Microsoft Teams Meeting

Questions are attached.

Our primary objective is to better understand how EPA calculated EtO emissions and risk for PA's 3 facilities (B. Braun Medical, COSMED, and ACS), but we have some additional questions about the public meeting process.

Andrew
